

Town of Watertown Rural Internet Grant Information

Introduction:

As you may have heard the Town of Watertown and the ToW Rural Internet Grant Committee has been working through the process in creating an application for a grant over the last year. The result of all the hard work is that the application was awarded, and the grant has been approved for the Town of Watertown. The last part of the process before any work can begin will hopefully be completed before this letter is distributed.

Communication:

We will be holding meetings at the Town Hall periodically to discuss parts of the rollout.

You should pay close attention to the Town Hall website for these events.

We will try to send emails out, however, we require that we are provided your most recent email contact information.

If you would like to be notified by email, please send an email to grantcommittee@townofwatertown.net providing us with your first and last name and address.

This information will not be shared. It simply will be used to create a distribution list for email.

We will reply to you, so you know we have received it.

The co-applicant with the Town of Watertown is Netwurx Internet, LLC.

Netwurx will also provide information on their website as well. Simply look for the ToW Grant Icon.

Ken Baehler, who was on our ToW Rural Internet Grant Committee, and the project manager for this project, will assist in providing and rolling out information to the residence of the Town of Watertown.

Time Frame:

The timeframe for implementing parts of the solution will be underway immediately. The entire implementation of the solution is scheduled to be completed in two years, although we are hoping it will take less time. We also hope to apply for Phase 2 of the project under the next round of potential grants.

FAQ:

There are copies of this document available at the Town Hall that you can pick up at any meeting nights. It can be emailed to you upon request if we have your information.

This information will be made available on the Town Hall and Netwurx Web sites.
